Github: <https://github.com/JoaoVitorSPereira>

Mobile Software Engineer with over **5 years of experience** building and maintaining production mobile applications using **React Native**, **Expo**, and **TypeScript**. Experienced in developing secure, scalable applications across fintech, social networking, logistics, and live streaming industries.

Strong background in mobile authentication, native SDK integrations, REST APIs, application performance, and publishing applications to both the Apple App Store and Google Play. Passionate about delivering high-quality user experiences while collaborating with cross-functional teams in agile environments.

Experience

DKMBank | Sao Paulo, BR

Mobile Software Engineer | 07/2024 - Present

Develop and maintain a production fintech application focused on secure banking services and money transfer operations.

Key Responsibilities & Achievements

- Develop and maintain production-ready mobile features for a digital banking platform.
- Integrate third-party native SDKs for biometric verification, liveness detection, identity validation and fraud prevention.
- Implement secure authentication flows using encrypted storage, App Attest and platform security features.
- Develop and maintain REST API integrations in collaboration with backend engineers.
- Manage production releases using Expo EAS Build and EAS Update.
- Publish and maintain applications on both Apple App Store and Google Play.
- Improve application stability, maintainability and performance through architectural improvements and code optimization.
- Participate in feature planning, debugging production issues and continuous product improvements.

Technologies

React Native • Expo • TypeScript • Zustand • React Query • REST APIs • Expo Router • Native SDK Integration • App Attest • Biometrics • EAS Build • EAS Update

ECGlobal | Bahia, BR

Mobile Software Engineer | 12/2022 - 07/2024

Worked on a large-scale social networking platform focused on consumer engagement and gamification.

Key Responsibilities & Achievements

- Developed new features used by thousands of application users.
- Migrated the application from React Native CLI to Expo, improving maintainability and deployment workflows.
- Implemented gamification features and user engagement experiences.
- Built performant UI components and optimized rendering performance.
- Worked with React Native Web to support multiple platforms.
- Collaborated with designers, backend engineers and QA throughout the development lifecycle.
- Participated in production deployments and application maintenance.

Technologies

React Native • Expo • React Native Web • TypeScript • React Query • Styled Components • REST APIs

BuiltCode | São Paulo, BR

Mobile Software Engineer | 05/2022 - 11/2022

Worked on a logistics and delivery platform supporting delivery operations.

Key Responsibilities

- Developed new mobile features for delivery management.
- Implemented Google Maps integration and route visualization.
- Built delivery tracking functionality.
- Integrated Firebase Cloud Messaging for push notifications.
- Consumed REST APIs and collaborated with backend developers.
- Participated in application publishing and maintenance.

Technologies

React Native • Firebase • Google Maps • Redux • REST APIs

Mercado Network Systems | Pernambuco, BR

Mobile Software Engineer | 02/2022 - 05/2022

Developed features for a live video streaming application.

Key Responsibilities

- Built reusable React Native components.
- Developed live streaming related features.
- Improved application usability and performance.
- Worked closely with product and design teams.

Usabit | Rio de Janeiro, BR

Frontend & Mobile Developer | 02/2020 - 02/2022

Key Responsibilities

- Developed applications using React and React Native.
- Built reusable UI components.
- Integrated REST APIs.
- Collaborated with senior developers to deliver production features.
- Participated in code maintenance and application releases.

Skills

Typescript, Javascript, React Native, Expo, Expo Router, React Navigation, Zustand, Redux , Context API, REST APIs, GraphQL, React Query, Native SDK Integration, Push Notifications, Deep Linking, Biometrics, App Attest, Secure Storage, Firebase, Git, EAS Build, EAS Update, Apple App Store Connect, Google Play Console, Android Studio, XCode, Postman, Figma, Github

Education

Universidade Paulista (UNIP) | São Paulo, BR

Analysis and Systems Development | 10/2022

Languages

English, Portuguese
